

As a fellow federal employee, working to help rid the world of chemical agents, I listen exclusively to XM radio as the NAB does not provide any stations where I work that I want to listen to. I also find it very helpful to listen to traffic and weather when I return home to Saint Louis on weekends. There are no suitable sources for this information provided by NAB as I traverse central Illinois.

I view any constraints on the ability of XM radio to provide me with valuable information and programming to be a violation of the Constitution's first amendment.
